

Firestone's EnviroReady™ Roofing System and Warranty

The importance of a well engineered roofing system is critical to the performance of a photovoltaic (PV) system. The EnviroReady Roofing System and Warranty allows a building owner to install a high-quality roof today and defer PV costs to a later date. The funds for capital investments are not as prevalent in today's economy; however the building owner may still need a roof. The EnviroReady Roof offers a proven 20, 25, or 30 year system that can be upgraded when incentives are more lucrative or funds become available.

EnviroReady Roofing System: Warranted for Today.....Warranted for Tomorrow

- Allows the installation of PV within the next 7 years, without a warranty disruption.
- Warranty offers a free inspection prior to installation to ensure the roofing system will perform as intended
- Warranty offers a free post-installation inspection to ensure no incidental damage occurred that could harm the waterproofing system
- System utilizes new ISOGARD™ HD board as a cover board
- System utilizes Firestone's Premium System membranes, using fully adhered EPDM or TPO only
- Firestone Exclusive System
- Installing a fully adhered TPO Roof with PV or Garden can help satisfy LEED credits

TPO System with PV

Firestone

ENERGY SOLUTIONS

Firestone is pleased to announce the introduction of Firestone Energy Solutions, helping to provide single source options for solar energy. This new division is committed to providing products, systems and services that assist in the conservation and production of energy for the building envelope. Through a comprehensive offering of rooftop photovoltaic and wind systems, Firestone is positioned to provide either turn-key or custom energy solutions to meet renewable energy demands.

About Firestone Building Products:

Firestone Building Products manufactures a full line of roofing systems, insulation and accessories to meet all commercial, industrial and institutional building needs. Large or small, new or re-roof, local or international, Firestone is a single-source manufacturer for quality single-ply EPDM and TPO roofing systems, modified bitumen systems, and metal roofing products, as well as a full line of standard and tapered polyiso insulation and roofing accessories. Firestone offers installation expertise and product support through roofing solutions and technical services departments, and an international network of roofing contractors, distributors, and field sales representatives. Headquartered in Indianapolis, Ind., Firestone Building Products is an operating company of Firestone Diversified Products, LLC. Visit Firestone at www.FirestoneBPCo.com.
